

Joplin's Recovery

The story of Joplin's recovery over the past ten years is a Miracle of the Human Spirit. This map shows the locations of new and revitalized community projects, facilities, schools, training and technology centers, renewed neighborhoods, and other amenities like parks and major tree restoration plantings. These projects span across all community sectors with the goal to build back better than before. Scanning the QR codes will reveal each project's details and their value to the community.

What cannot be shown through pictures or maps is the love and generosity of those who came to our aid. We are extremely grateful to the tens-of-thousands of volunteers who helped rebuild Joplin and not only lifted our spirits, but gave of their time, talents, and lives to help us recover.

Following the devastating disaster, our federal, state and local partners provided the Joplin community more than \$321 million for clean-up efforts, debris removal, and rebuilding and recovery projects, contributing to the continued growth we are experiencing today.

We each carry a story of that fateful day and the days following, and we will never forget the love and support given to us during these past ten years.

Thank you to everyone who helped pave the road to Joplin's recovery. With your help, we stand Joplin Strong as we build back better for future generations.

A ROADMAP TO *Building A Better Future*

Joplin Moves Forward

Immediately following the disaster, our citizens were joined by thousands of volunteers and workers from local, state and federal agencies who joined us in every phase of our clean up and recovery. As Joplin moves forward, we recognize and appreciate the collaboration and commitment of all those who worked alongside us during the past ten years of recovery.
